

How to request PRIMAR or UNIO charts by route in Navi-Planner

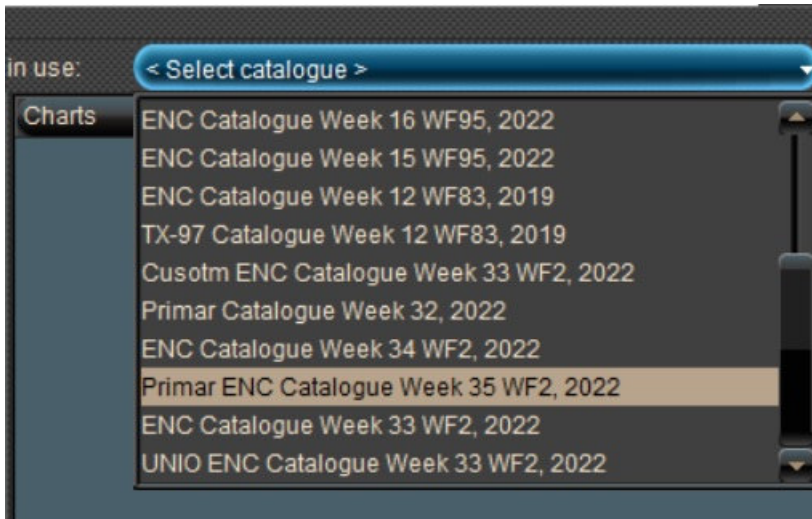

1. Start Navi-Planner from the Transas Integrator

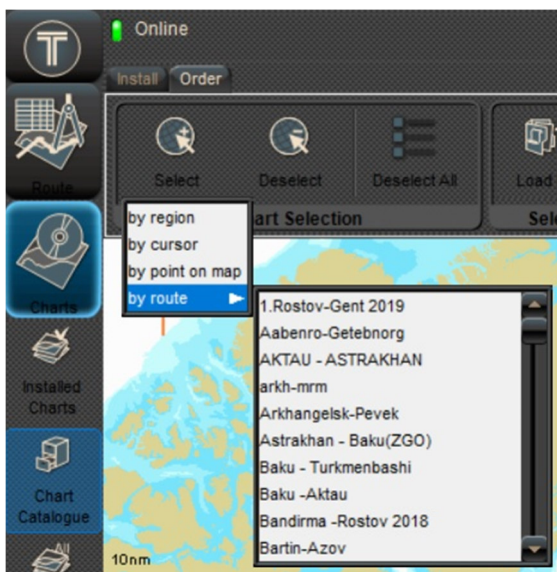

2. Click on the “Charts” and press on the “Chart Catalogue” button

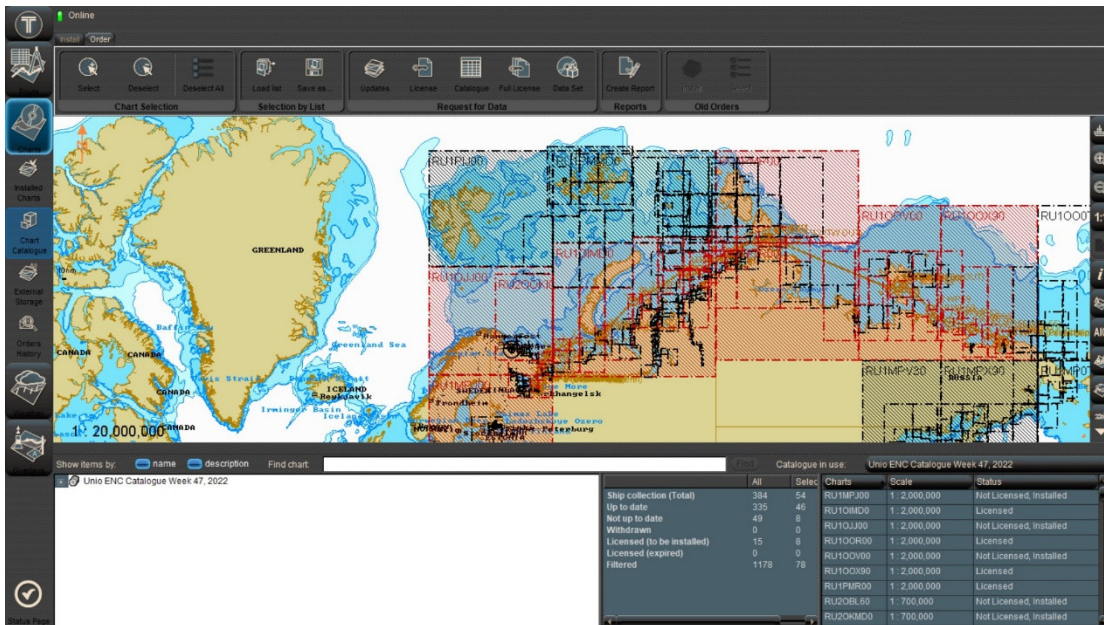

3. From the Current catalogue field load the Primar or UNIO catalogue. See document: **1_How to install Primar or UNIO catalogue to Navi-Planner**

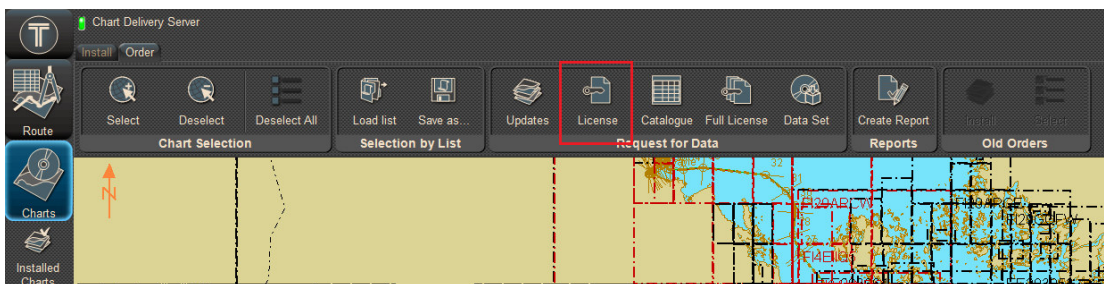

4. Select ENC by route or manually

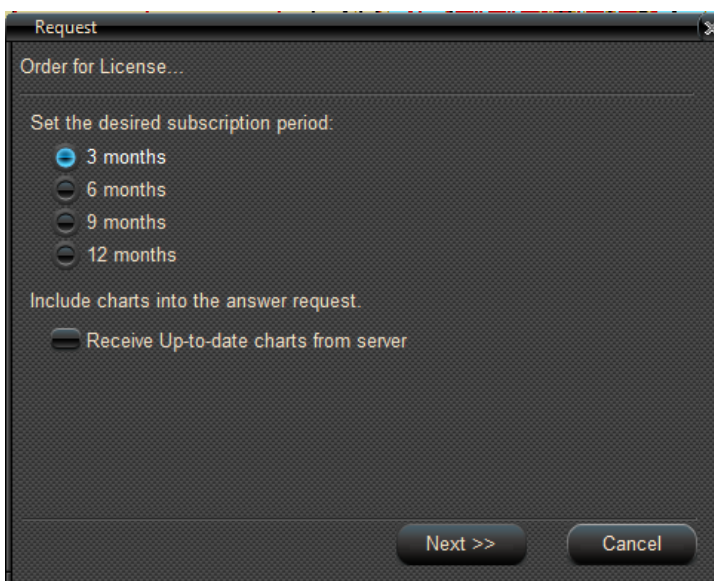

5. Navi-Planner will show the selected charts by red

6. From the “Request for Data” group click “License”

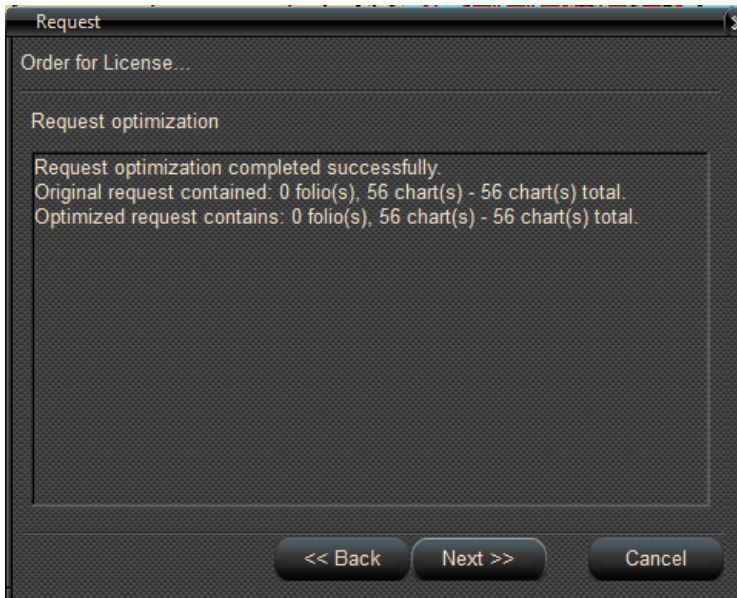

7. On the appeared “Request” window select license period
Press “Next >>” button:

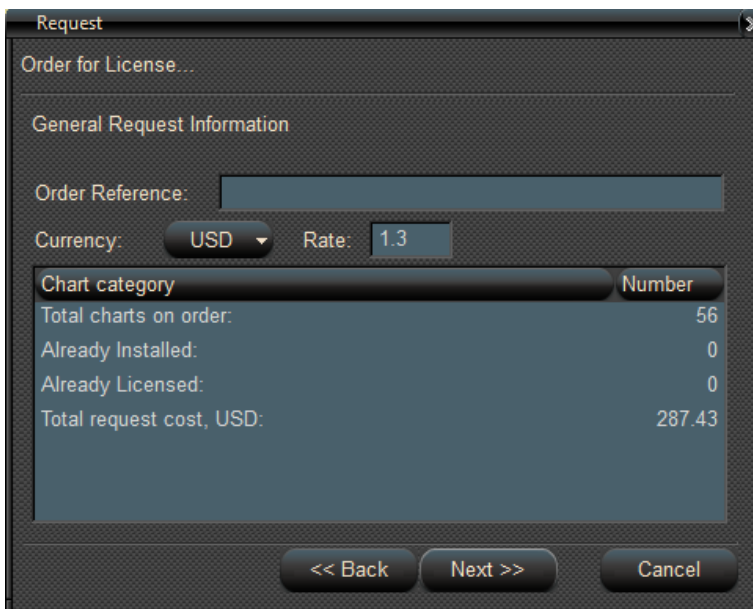

NOTE: If you don't select check box «Received Up to date charts from the server» you will receive up to date charts from the server anyway.

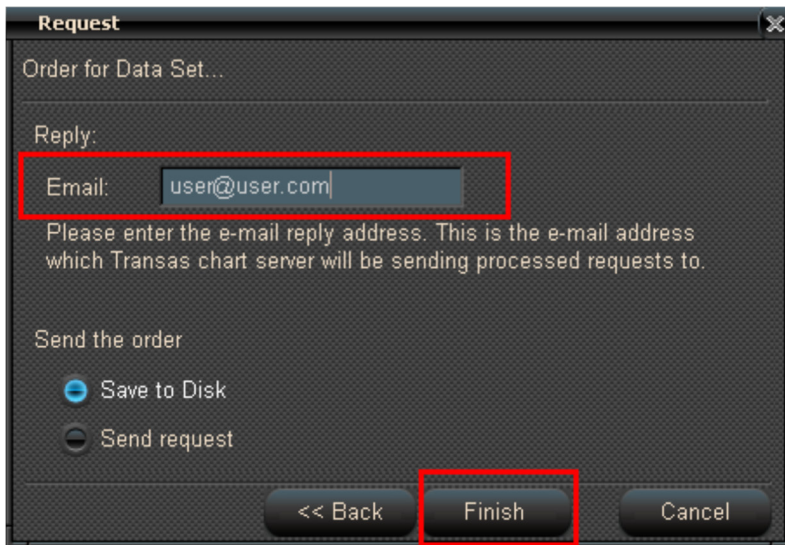

8. Next "Request" window appeared. Press "Next >>" button:

9. In the next "Request" window you will see approximately cost of the ordering charts. Press "Next >>" button:

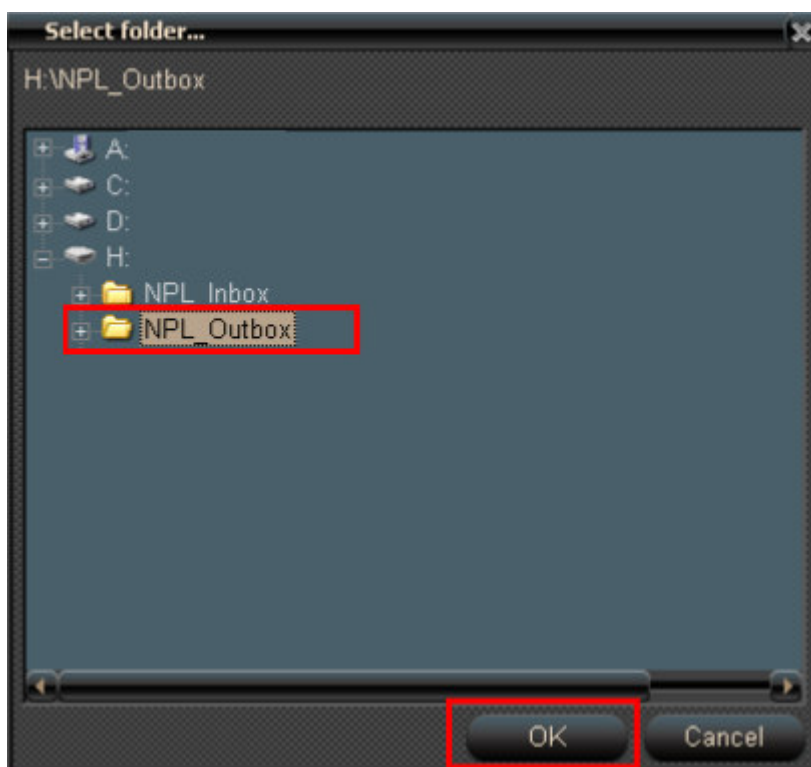

10. Choose the "Save to Disk" option and enter the e-mail address which was registered on Transas Chart Server. Click "Finish" button

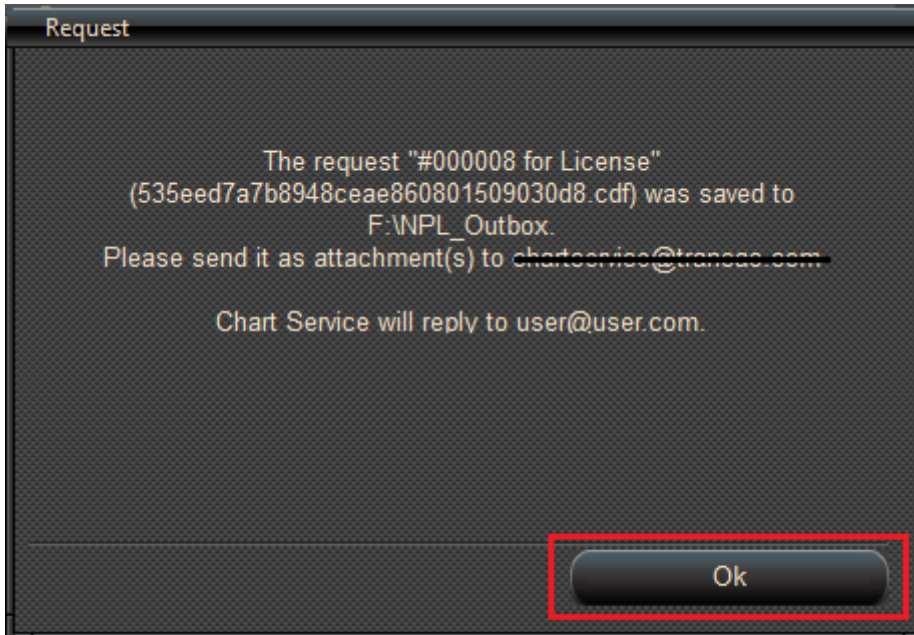

11. On your USB stick it is necessary to create two folders: **NPL_Inbox** and **NPL_Outbox**

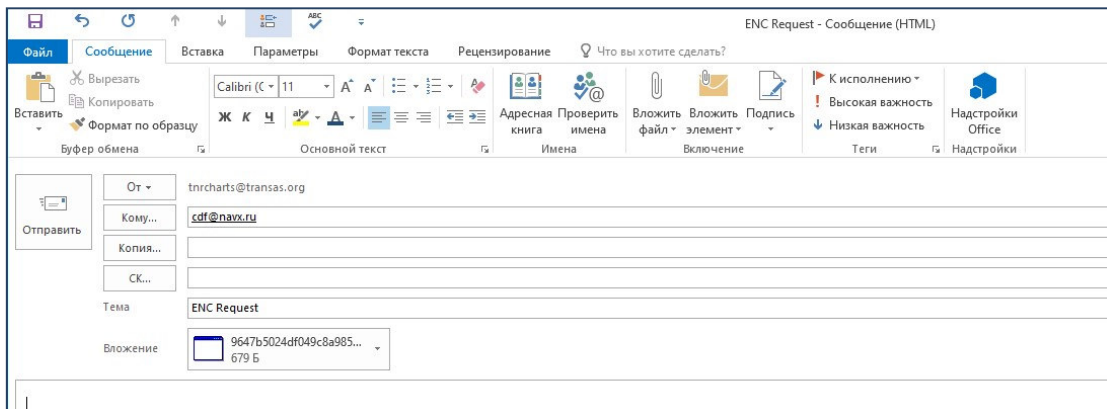

12. From the "Select folder..." window browse your USB stick, the "NPL_Outbox" folder. Press "OK". The request will be saved in here

13. The confirmation window will appear. Please ignore email address indicated in the window. Click "Ok" button

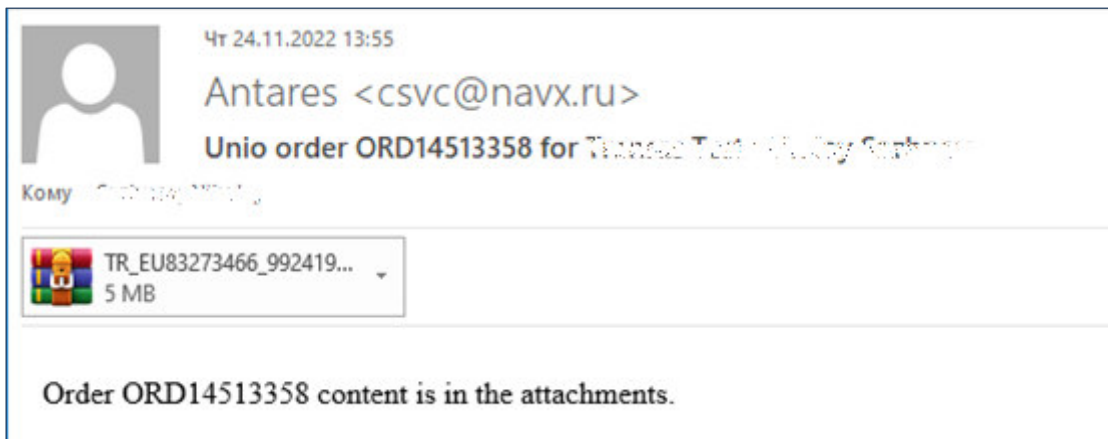

14. Send request by email to cdf@navx.ru

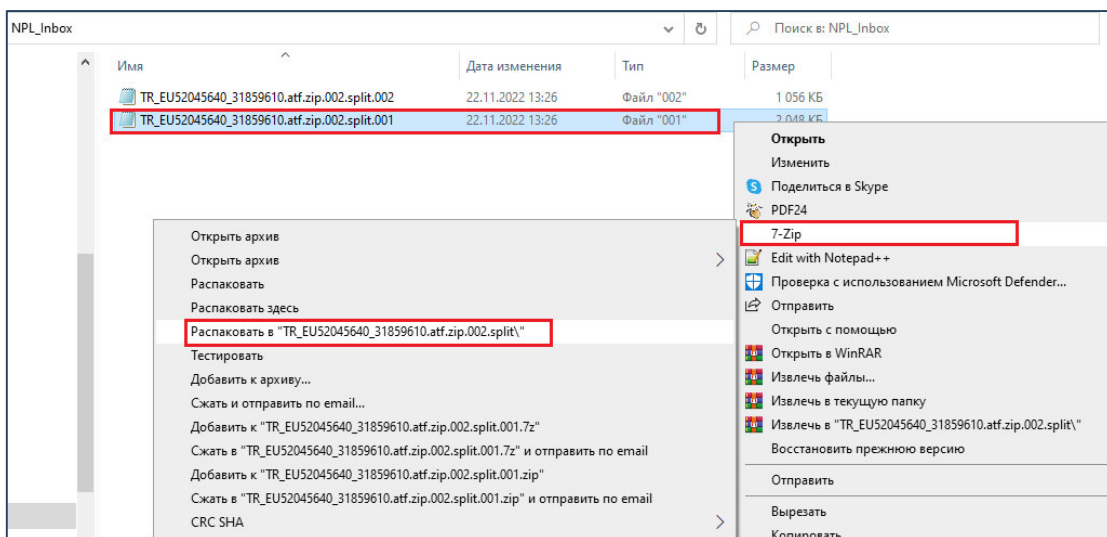

NOTE: One email should contain one request

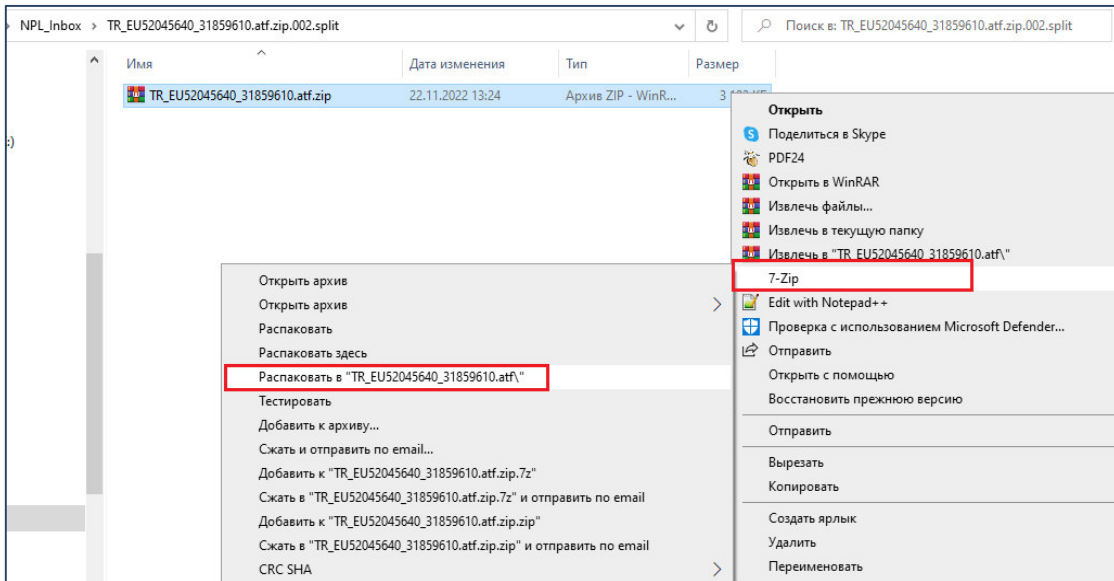

15. In a short while our server will revert to you with the Permits and Data set. When the reply is received save all attachments to your USB stick, in to the **NPL_inbox** folder

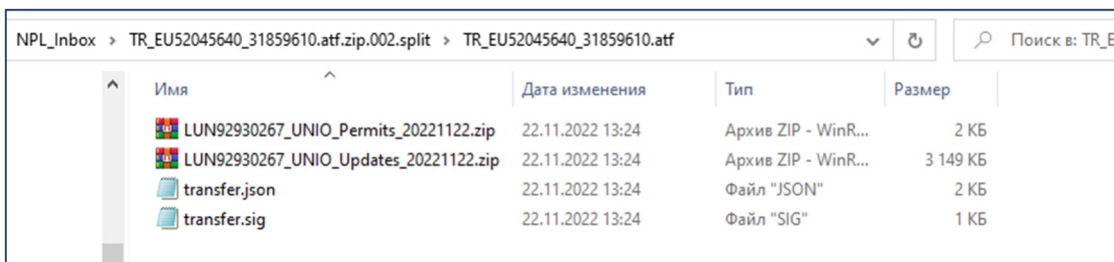

16. Extract **only** first part of archives

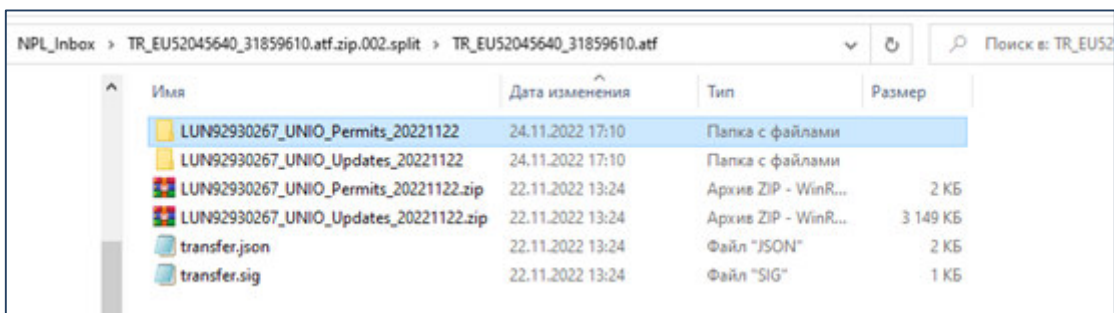

17. You will get new archive. Extract it again

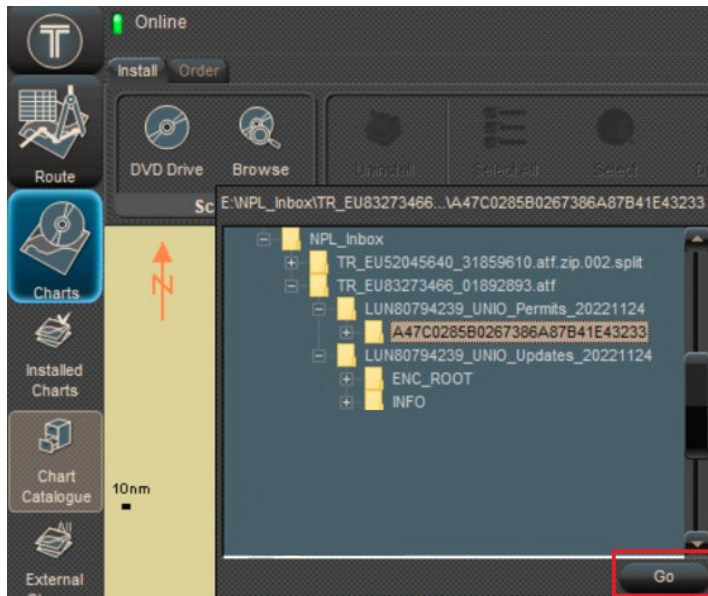

18. Finally, you will get new archive with Permits and Updates (data set)

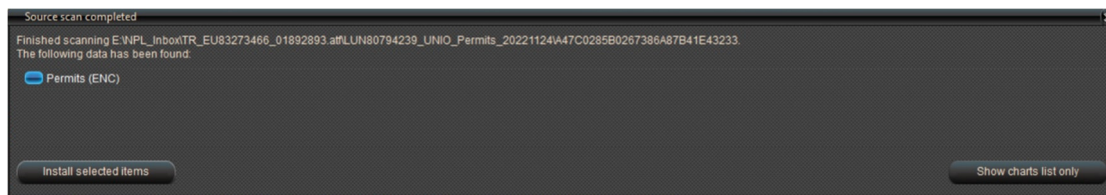

19. Extract archives with Permits and Updates (data set) before installation to Navi-Planner

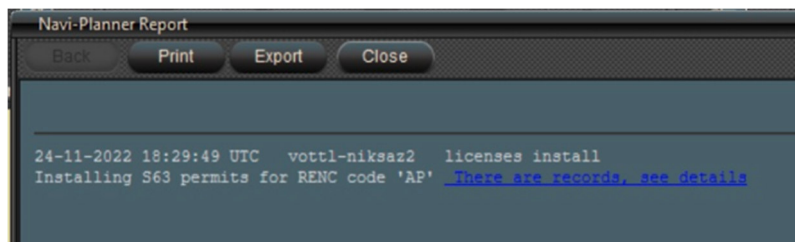

20. Click "Browse" button and browse **NPL_inbox/... /...UNIO_Permits/_** folder from your USB stick. Click "Go" button

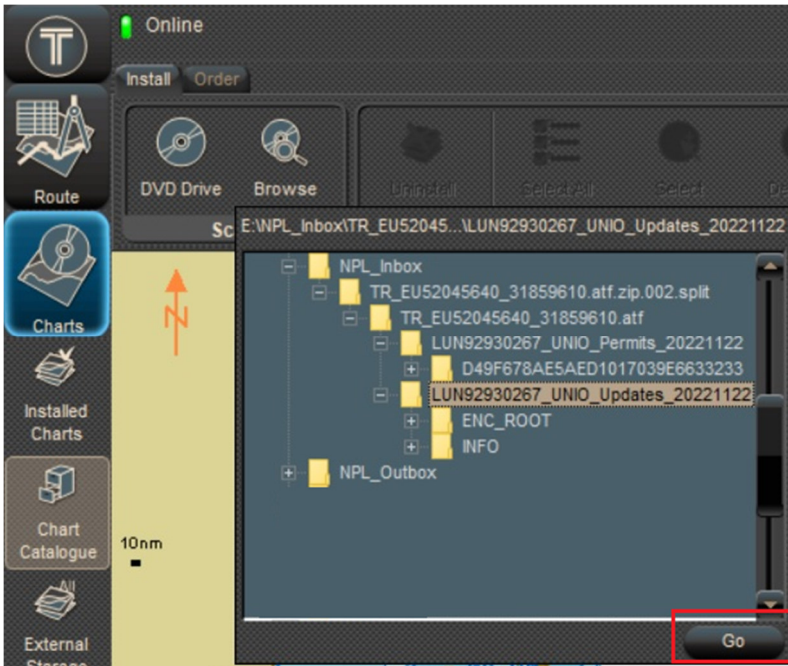

21. In a few seconds, the “Source scan completed” window will appear. Click “Install selected items”

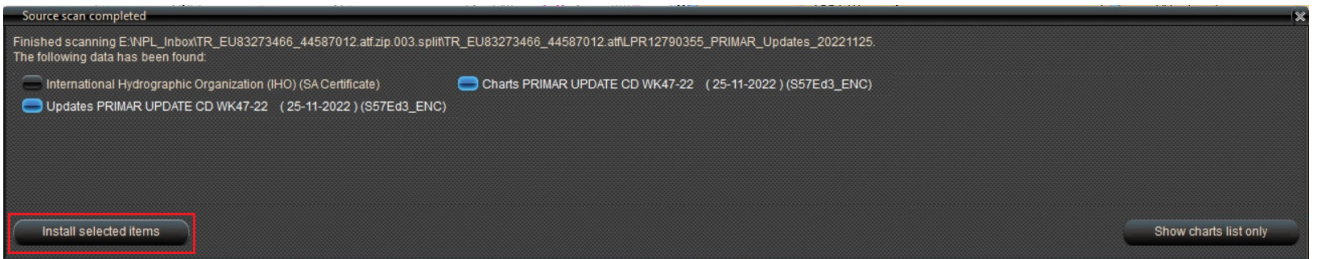

22. You will see permit installation report

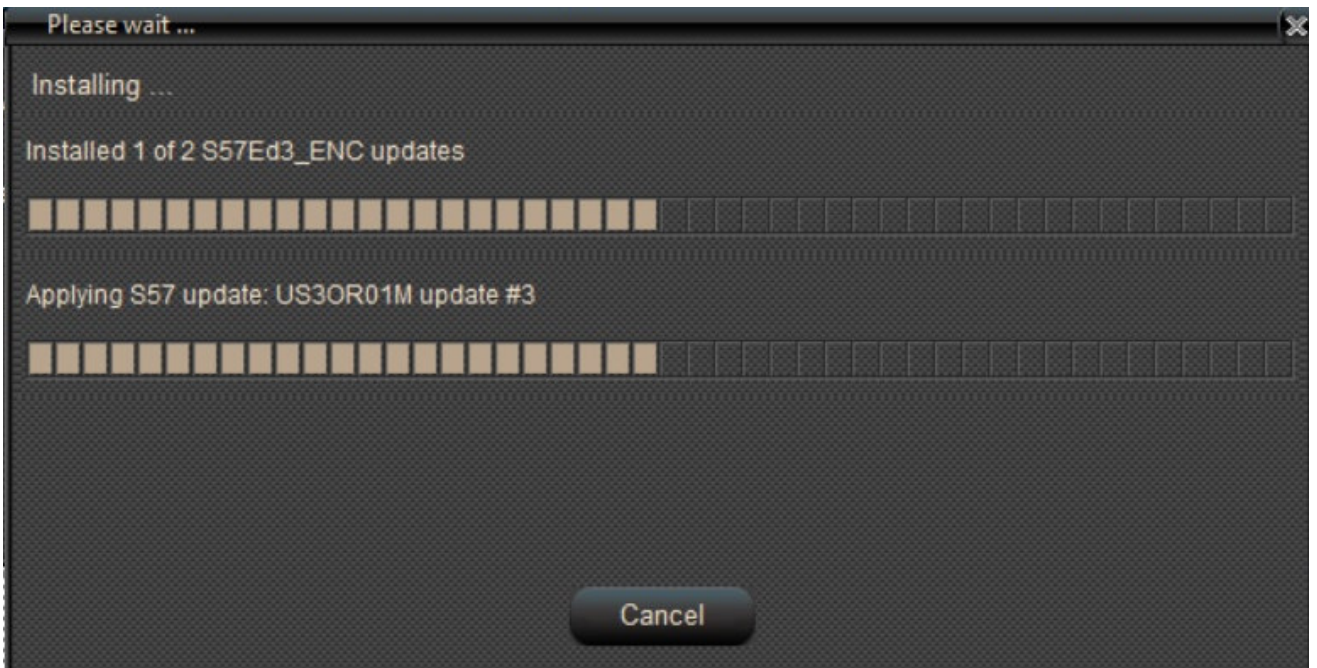

23. Click “Browse” button and browse **NPL_inbox/... /...UNIO_Updates/_** folder from your USB stick. Click “Go” button

24. "Source scan complete" window will appear. Press "Install selected items"

25. You will see process of installation ENC and Updates

26. When installation complete you will see Installation report
