

How to request PRIMAR or UNIO Data Set from Transas chart sever (Antares)

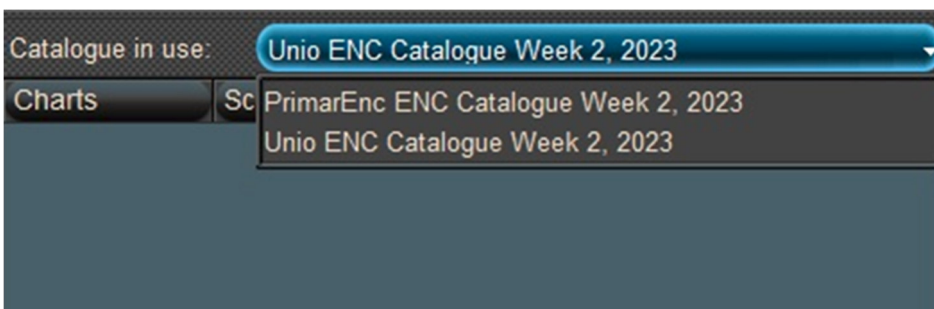

1. Start Navi-Planner from the Transas Integrator

2. Click on the “Charts” and press on the “Chart Catalogue” button

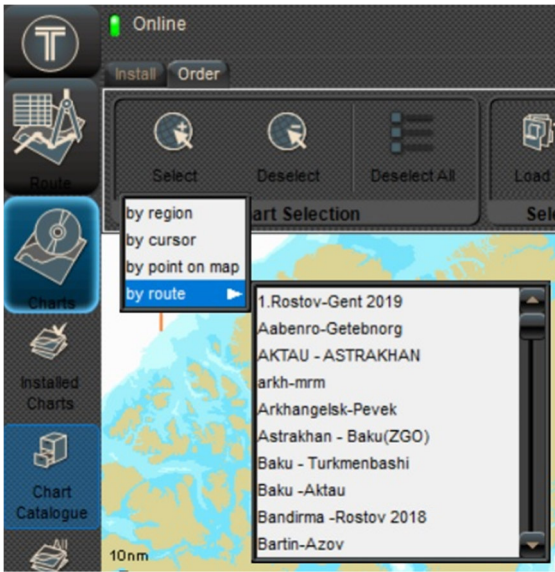

3. From the Current catalogue field load the **Primar** or **UNIO** Catalogue. See document: **1_How to install Primar or UNIO catalogue to Navi-Planner**

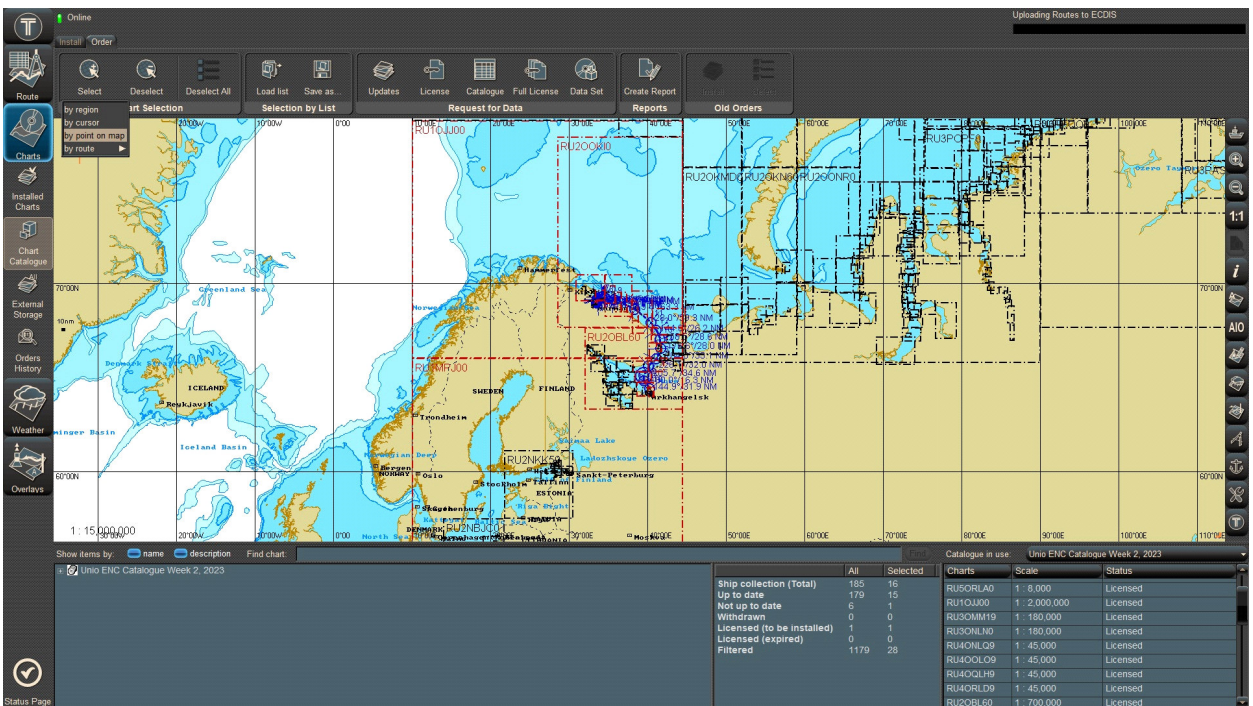

4. Select ENC by route or manually

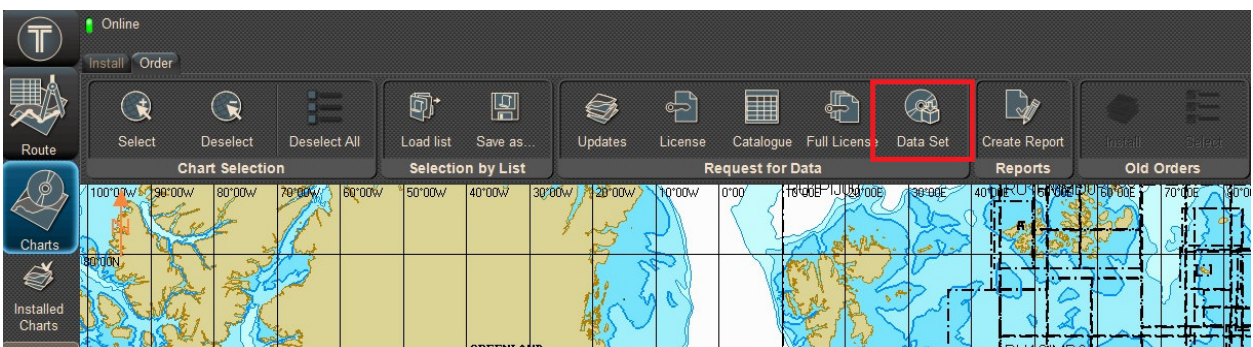

Important Note: You can request Data set only for licensed charts

5. Navi-Planner will show the selected charts by red

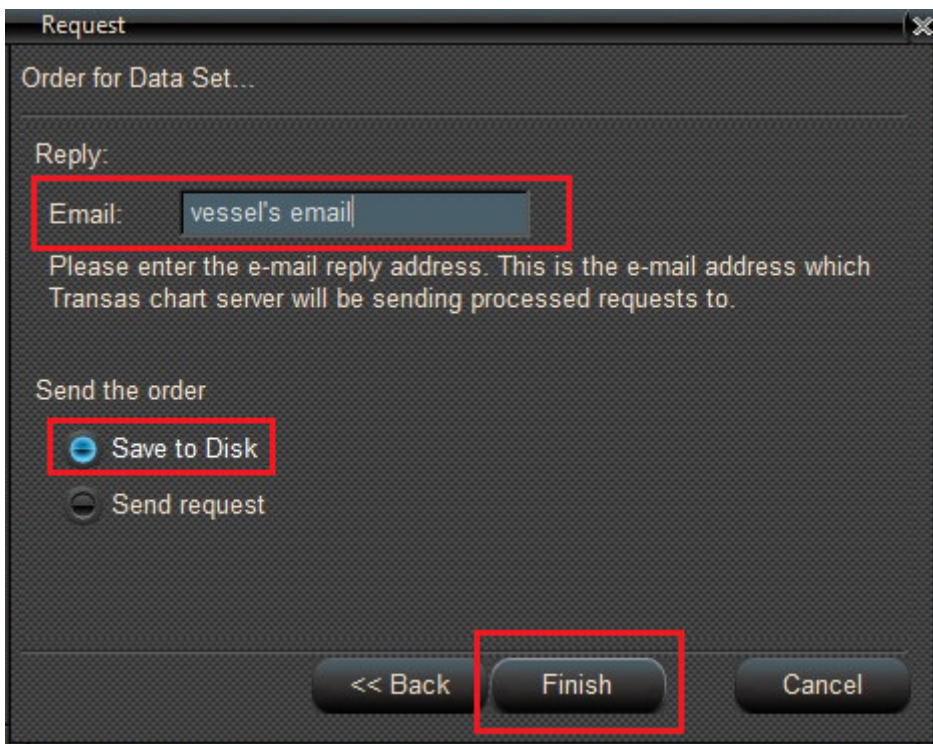

6. From the "Request for Data" group click **Data Set**

7. Order for Data Set... window will appear. Select check box **TADS** and Press **Next>**

8. Choose the "Save to Disk" option and type the e-mail address which was registered on Transas Chart Server. Click **Finish** button

9. From the "Select folder..." window browse your USB stick, the "NPL_Outbox" folder. Press "OK". The request will be saved in here

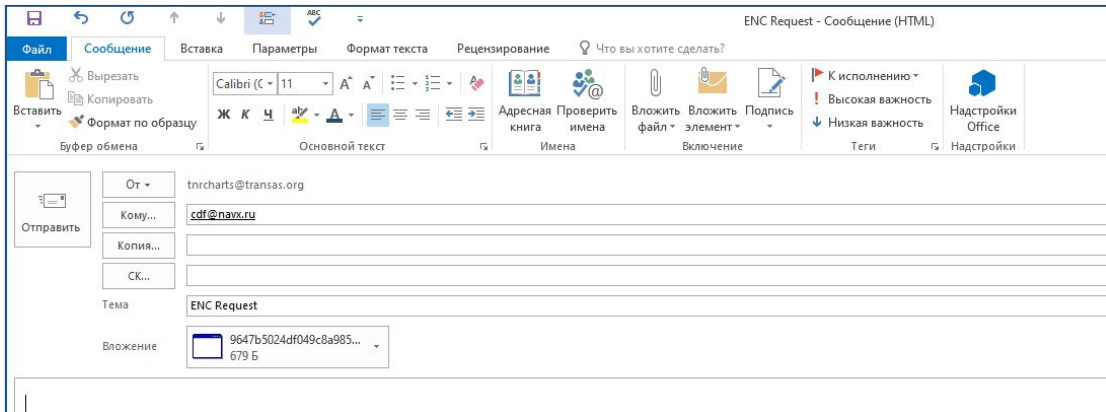

10. The confirmation window will appear. Please ignore email address indicated in the window. Click "OK"

11. The confirmation window will appear. Please ignore email address indicated in the window. Click "OK"

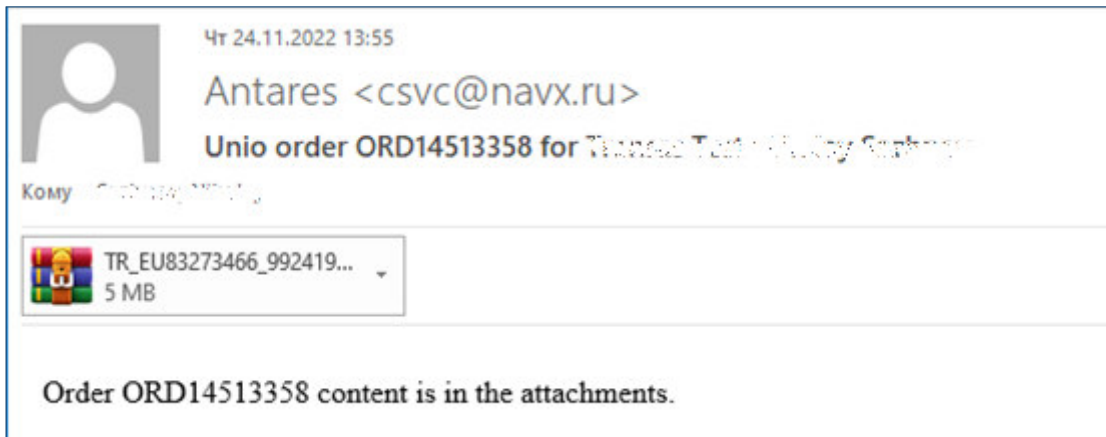

12. Send request by email to cdf@navx.ru

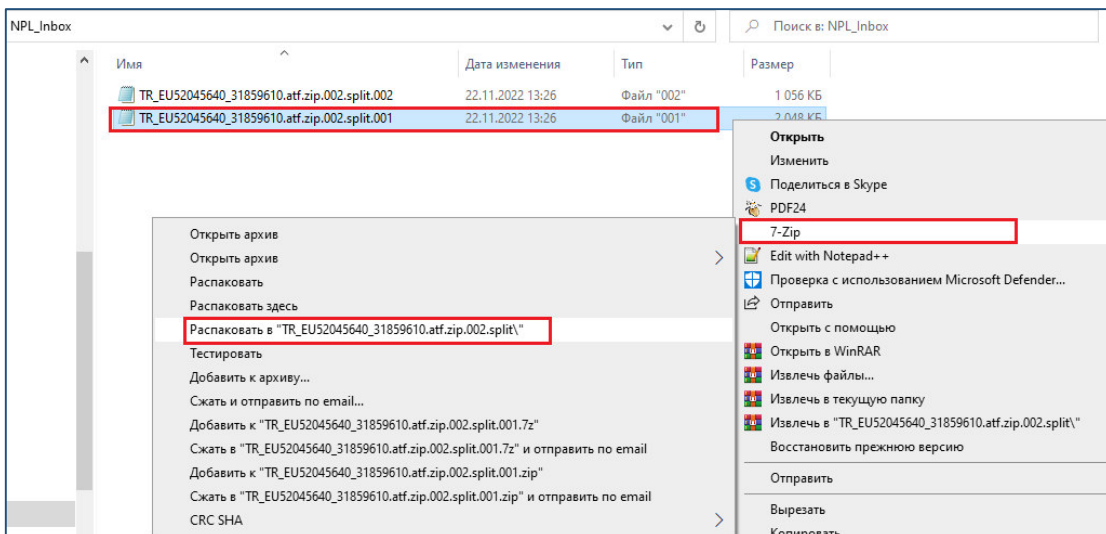

NOTE: One email should contain one request

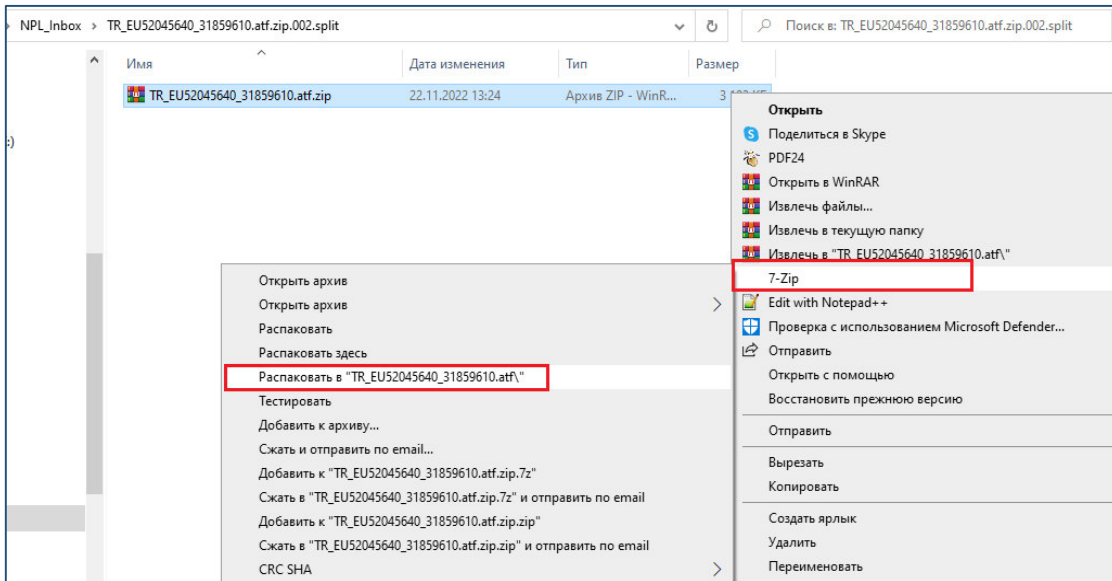

13. In a short while our server will revert to you with the Permits and Data set. When the reply is received save all attachments to your USB stick, in to the **NPL_inbox** folder

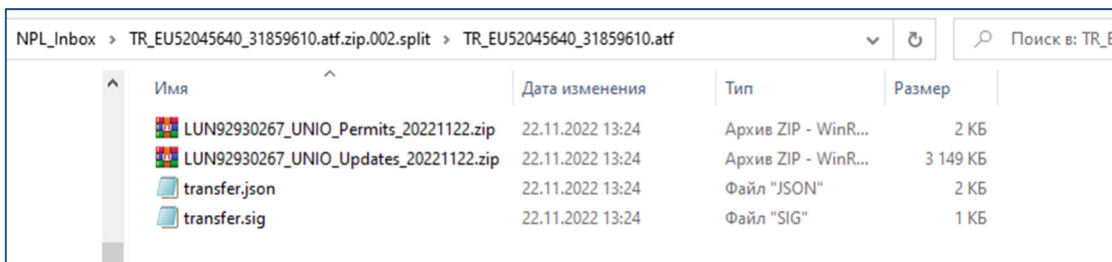

14. Extract **only** first part of archives

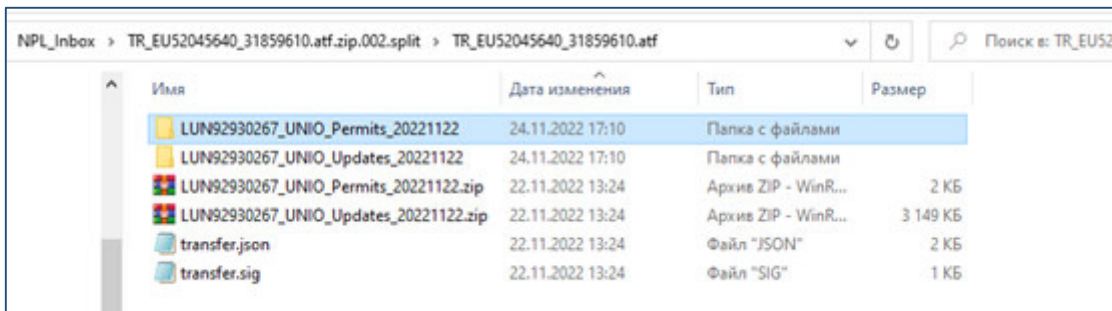

15. You will get new archive. Extract it again

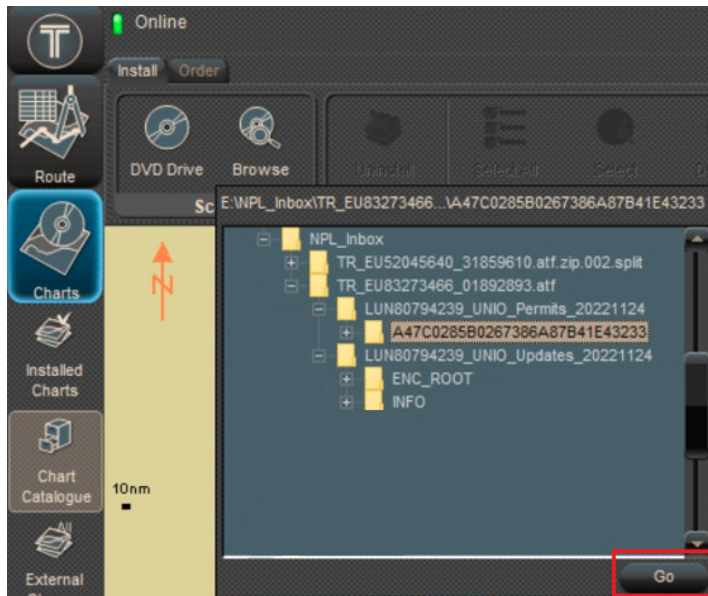

16. Finally, you will get new archive with Permits and Updates (data set)

17. Extract archives with Permits and Updates (Data set) before installation to Navi-Planner

18. Click "Browse" button and browse NPL_inbox/... /...UNIO/Primar_Permits/_ folder from your USB stick. Click "Go" button

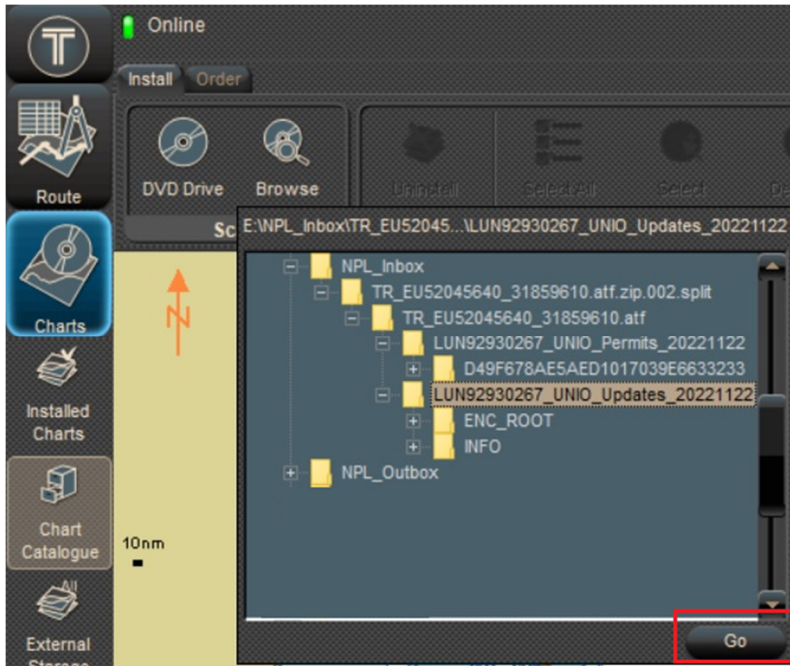

19. In a few seconds, the “Source scan completed” window will appear. Click “Install selected items”

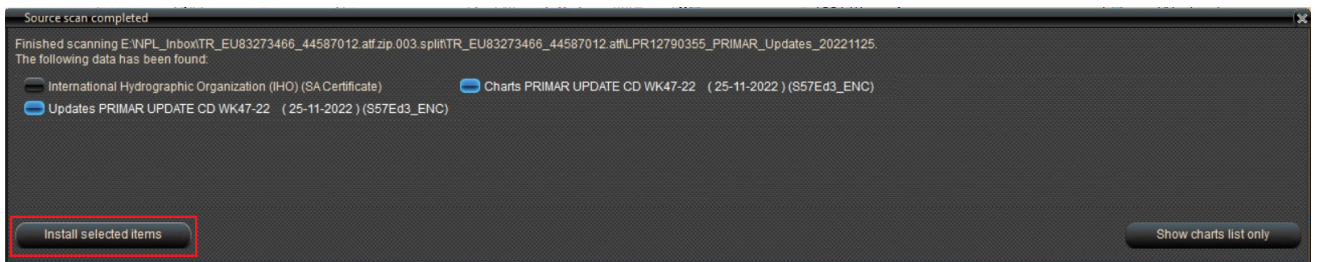

20. You will see permit installation report

21. Click “Browse” button and browse **NPL_inbox/... /...UNIO/Primar_Updates/_** folder from your USB stick. Click “Go” button

22. "Source scan complete" window will appear. Press "Install selected items"

23. You will see process of installation Data Set (ENC and Updates)

24. When installation complete you will see Installation report

Navi-Planner Report
